The following components are included in this kit:

A. 10 Ft. Telescopic Handle
B. Microfiber Flat Duster
C. Squeegee/Scrubber
D. Terylene Cover
E. 2-Piece Light Bulb Changing Kit
F. Fan Duster
G. Fuzzy Wuzzy® Swooz™ Multi-Flex All-Purpose Duster
H. Spider Web Broom Duster
I. Bendable Chenille Duster

INSTRUCTIONS FOR USE AND CARE:
This cleaning kit is for indoor use. Simply attach the Telescopic Handle to any of the components by screwing the handle into the threaded hole in the end of the component handle.

A. 10 Ft. Telescopic Handle
Extends from approximately 40 inches to approximately 120". Turn the handle counter-clockwise to loosen the locking mechanism and change the length. Once the desired length is reached, turn the handle clockwise to lock the mechanism. A label is attached to the side of the handle to illustrate.

B. Microfiber Flat Duster (rectangular)
Use for multiple dusting tasks. Simply shake out surplus dust on completion. Can be hand washed in lukewarm water with a light fabric detergent and hung to dry. Do not clean in a washer or a dryer. The center metal shaft can be bent by hand if required to make it easier to clean surfaces that are difficult to reach, like the top of a bookcase.

C. Squeegee/Scrubber
A combined polypropylene framed squeegee blade and sponge head. Use the sponge head with soapy water or chemical to clean glass or hard surfaces then use the squeegee blade to remove excess moisture to speed up drying. Simply rinse sponge and squeegee when finished.

D. Terylene Cover
A loose Terylene microfiber cover is supplied. This slips over the sponge head of the Squeegee/Scrubber to provide a smoother microfiber cleaning action. The Terylene cover can be removed and washed with a gentle or fine fabric wash; do not use fabric softener. Air dry or use the delicate cycle of a dryer.

E. 2-Piece Light Bulb Changing Kit

1. Shut off the electrical circuit that powers the bulb you are changing. Allow time for the bulb to cool before changing.
2. Attach the appropriate bulb changer to the telescopic handle.
3a. For the Clamp Attachment:
   - Slide the clamp attachment over the bulb you are changing. Turn to loosen and remove.
   - Place new bulb in clamp attachment and insert it into electrical socket, turn to tighten. Once the bulb is securely in place, gently remove the clamp attachment by pulling downwards.
3b. For the Suction Cup Attachment:
   - Thread the included string through the hole on the plastic base & tie it to the tab on the suction cup. The string should be longer than the pole.
   - Push the suction cup gently but firmly onto the center of the bulb so that it suctions onto the bulb. Suction can be increased with a little moisture. Turn to loosen and gently remove the bulb.
   - Gently but firmly push a new bulb onto the suction cup until suctioned on. Carefully lift and screw the bulb into the socket. After the bulb is completely inserted, pull the string to release the suction.

Warning: Never use the light bulb changers on circuits that are on, or around loose or exposed wiring. Wear safety glasses and be certain to use the correct bulb changer on the type of bulb you are changing.

F. Fan Duster

Ideal for cleaning ceiling fan blades. Before use, make sure that fan is switched off. Simply slide center opening of Fan Duster over fan blade and move back and forth to clean top and bottom of fan blade simultaneously. Shake outside to remove surplus dust. Can be gently hand washed with a mild detergent and hung to dry. Do not clean in a washer or dryer.

G. Swooz Duster (16" long)

Multi-flex all purpose cleaner, conforms to any shape you are cleaning. Use wet or dry; reduce use of chemicals. Dusts and polishes without scratching. Machine washable on gentle cycle; do not use bleach or fabric softener. Lay flat or hang to dry; do not tumble dry.

H. Spider Web Broom Duster (dome-shaped)

To easily and effectively remove cobwebs the first time and every time. Can be hand washed with a mild detergent and lay flat to dry.

I. Bendable Chenille Duster (longest component)

Perfect for cleaning those hard to reach surfaces. Fold it in half, twist it or curl it – this duster can be manipulated into any shape for easy cleaning. Made from microfiber, this duster acts a magnet attracting lint and dust even without the use of a cleaning agent. The cloth can be easily taken out of the rod and can be hand washed with a mild soap and hung to dry.
