Operating Instructions

INSTRUCTIONS:
1. Plug the Remote Base into a 120VAC electrical outlet.
2. Plug your electrical device(s) into the remote base. Make sure that your electrical device is powered ON.
3. Use the buttons on the Remote Control to turn your device(s) ON and OFF.

COMMAND1 TRANSMITTER PAIRING:
Note: Your Command1 Transmitter and receiver contained in this package are pre-programmed and ready to use. Command1 Pairing is only required for using new Command1 transmitter.

This unit is equipped with patented command1 technology. All Stanley indoor and outdoor transmitters bearing the command1 logo have the ability to be paired with all Stanley indoor and outdoor receivers. Please follow the directions below to pair a transmitter to your receiver.

1. Locate the power (ON/OFF) button on the receiver.
2. Press and hold the power button for 3 seconds. The LED power indicator will begin to flash slowly.
3. On your transmitter, (LED indicator still flashing slowly) press the [ON] button, wait 2 seconds and then press the [OFF] button. The LED indicator will now stop flashing.
4. You have successfully paired the transmitter to your receiver.

RESETTING THE UNIT
You can reset and remove all paired transmitters on your receiver by doing the following:
1. Press and hold the [ON/OFF] button for 3 seconds. The LED indicator will begin to flash slowly. Continue to hold for an additional 3 seconds. The LED indicator will now begin to flash rapidly. Release the [ON/OFF] button for 1 second and press once again to confirm reset. The LED indicator should now be OFF.
2. Your unit has now been reset and does not have any paired transmitters. (Note: After reset, pairing is required to use the transmitter shipped in this package.)

Troubleshooting Tips:
The receiver doesn’t turn on.
Make sure the AC power cord is securely plugged into a 120VAC electrical outlet. Check the outlet by plugging in another device.

The remote doesn’t work.
Make sure the battery is fresh. Stand closer to the receiver: the range should be up to 80ft. Doors or Walls will reduce the remote distance.

Three Year Limited Warranty:
If within the first year from date of purchase, this unit fails due to a defect, exchange where purchased, or ship it prepaid with proof of purchase to THE NCC, 140 58th Avenue, Suite 140, Brentwood, CA 90047. Units that fail to operate during the second or third year from date of purchase must be shipped prepaid with proof of purchase to THE NCC. We will replace this unit. This guarantee excludes normal wear and tear and damage resulting from accident, alteration, or misuse. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Battery Information and Replacement:
The Remote Control uses a 3 volt CR2032 lithium battery. To replace, pull battery tab located at the bottom of the transmitter. Insert new CR2032 lithium battery, making sure to match up the + and - polarity markings. To test, press the [ON/OFF] button to make sure the LED lights up. Slide the cover back in. Do not dispose of batteries in fire. Batteries may explode or leak.

WARNING:
Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. This equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

CAUTION:
DO NOT splice, repair, or modify. Use only when not in use. Fully insert plug. DO NOT use damaged remote sets. Impact damage within the electrical circuit rating marked on the remote set. DO NOT plug in more than a total of 960 watts in this remote set. If watts are not marked on appliance, multiply ampere rating (on nameplate) by 120 to determine equivalent watts. Add determined watts for each plugged in appliance or lamp (sum of watts on bulbs) to find total watts being used. Operating temperature range OPC (25°F) to 40°C (113°F).
• Only use the batteries specified and be sure to match the + and - polarity markings.
• Do not mix old batteries and new batteries (or standard-cord nicd) with alkaline batteries.
• Remove exhausted or dead batteries from the product.
• Remove batteries if product is not to be used for a long time.
• Do not dispose of batteries in fire. Batteries may explode or leak. As with all small items, these batteries should be kept away from children. If swallowed, seek medical attention immediately.

*This item is a Radio Frequency Device (RF), and as such the range of the remote control is dependent on many factors. Actual operational distance will vary based on walls and line of sight obstructions, and other nearby electronic devices.

Batteries contain lead-acid, nickel-cadmium, lithium-ion, and alkaline batteries.
